

I am not sure that I understand all that comes in the new service nor just what will happen as a result of this new option. I am, however, made aware that it will either limit or eliminate one of my favorite radio stations: KLOVE. I would greatly appreciate the ability to listen to great music without someone else telling me it is not allowed simply because of the part of the radio dial it comes from. I would much rather you allowed the priorities to remain as they are.
